EMIRATES NBD - WHOLESALE BANKING

Broken link audit

Every current page, English and Arabic: links to pages, anchors, files and external URLs

163 pages checked · prepared 22 October 2026

0	167	2	581	9,847
missing files (images, video, CSS, JS)	links to pages that do not exist (142 on site pages)	dead external links	of 590 external links working	placeholder links (href="#")

Checked on every page: every link, image, video poster, script and stylesheet, plus in-page anchors and anchors on the target page, plus all 590 unique external URLs, requested live. Commented-out markup and links built by JavaScript are not included. Tombstones deep links (#ecm, #dcm, #agency and others) open the matching tab, so they are working, not broken.

01 Links to pages that do not exist

142 links on site pages point to files that do not exist. Every one is listed in the appendix with its page and line.

MISSING TARGET	LINKS	SUGGESTED FIX
`personal-home-v3a.html`	120	Live Personal site, or build the page
`commodities.html`	16	Build the page, or link to markets-v2.html
`corporate-institutional.html`	2	Decide the target (likely cib-home-final.html)
`businessonline-x-v1a.html`	2	businessonline-x-v2.html (AR: -ar)
`contact-us.html`	2	contact-us-v3.html (AR: contact-us-v3-ar.html)

A further 25 come from the component gallery (all-components.html) and do not affect the site. The header and footer blocks use ../ paths, which work inside the blocks folder but break in the gallery. The api-banking.html and businessonline-x.html links come from blocks.

02 External links not working

URL	STATUS	WHERE	SUGGESTED FIX
`https://ds-hu-9s249.ondigitalocean.app/cib-home-final.html`	401, old password-locked deploy (page head: canonical, Open Graph, alternate)	`cib-home-final-ar.html:9, cib-home-final-ar.html:10, cib-home-final-ar.html:11, cib-home-final.html:9, cib-home-final.html:10, cib-home-final.html:11`	Point to the real home page URL
`https://smartbusiness.emiratesnbd.com/`	Domain does not resolve	`smarttrade-v1a-ar.html:712, smarttrade-v1a-ar.html:926, smarttrade-v1a.html:762, smarttrade-v1a.html:983`	Get the current smartTRADE login URL

7 company logos on `upload.wikimedia.org`	429 rate limit during the check; they load normally	`all-components.html (from blocks/logo-wall-marquee.html)`	Not broken, but hotlinked: copy them into assets/webxv2/images/

https://businessonline.emiratesnbd.com/ works, but it redirects to businessonline2.emiratesnbd.com. Optionally update it to the new host.

03 Placeholder links (href="#")

These click through to nothing: 5,743 in the header, 3,788 in the footer and 316 in page content. Almost all come from the shared header and footer, so fixing those two blocks clears about 97% of them. That needs the real destination URLs, most of which are on www.emiratesnbd.com.

WHERE	LINKS THAT GO NOWHERE
Header	Segment tabs (Priority, Private, Emirati, Business, Islamic, International, Premium, Innovation); About us, Customer Care, ATM & Branches; the English/عربي links in the Our Websites menu; ESG, signONLINE, Economics, Markets, Forecasts
Footer	Careers, Community Engagement, Financial Results, Investor Relations, Modern Slavery Act, Debt Assist, Ways of banking, Update your information, IBAN/Swift codes, FATCA & CRS, Cookies Policy, Data Privacy Notice; the app download banners and social icons

04 Placeholder links by page

Sorted by placeholders in the page content, which are specific to that page. Header and footer counts are the shared blocks.
