EMIRATES NBD - WHOLESALE BANKING

Broken link audit, page by page

A screenshot of every broken link, outlined and numbered, with the fix

36 pages with their own issues, plus the shared header and footer · 22 October 2026

How to read this

Each page gets its own section. The screenshots show the affected parts of the page, with every broken link outlined in red and numbered. The table under them uses the same numbers: what the link says, what is wrong, and the fix. Arabic pages with exactly the same issues in the same places are covered in their English section.

Three kinds of problem: placeholder (the link is `href="#"` and goes nowhere), **missing page** (it points to a page that does not exist), and **dead website** (the external site no longer exists).
