WHOLE BANKING, FINAL · DESIGN SYSTEM AUDIT

Where the text button is used, and where it drifts.

Every `btn btn-text` in the master library and on the live pages: which masters carry it, how it is styled, and the small inconsistencies worth tidying.

AT A GLANCE

One button, four looks.

The text button is the quiet "go deeper" link: brand blue, bold, no box, with an arrow that nudges on hover (`is-arrow`). It is the most common link style in the library after the filled button. Below is how it renders today, straight from `ds.css`.

DEFAULT · IS-ARROW

See all transactions →

112 in masters · 261 on pages

SMALL · BTN-SM IS-ARROW

Explore →

30 in masters · 1 on pages

LARGE · BTN-LG IS-ARROW

See what's possible →

3 in masters · 26 on pages

ON DARK · INK-WHITE

Size

SIZE	MASTERS	PAGES
Default	112	261
Small	30	1
Large	3	26

Masters use Small 30 times (always inside cards); pages use it once. Card instances on pages have dropped `btn-sm`, so their links read one size larger than the master.

"See all" wording

PHRASE	USES
See all	23
View all	3

Same action, different verbs. "See all" is the clear majority.

FINDINGS

Six things worth tidying.

1 Typed arrows instead of the arrow switch

Big Statement writes the arrow into the label ("See what's possible →") with no `is-arrow`; 7 page links do the same. The typed arrow does not nudge on hover and does not match the arrow glyph used everywhere else.

Fix: Remove the typed arrow and add `is-arrow` (master first, then the pages).

equity-brokerage.html: See our highlights → · events-library.html: Read success story → · media-library.html: Read more → · payment-tracker-v1a.html: See what you get → · smart-cdm-v1a.html: See what changes → · support-businessonline-connect-v2.html: Explore businessONLINE Connect → · virtual-accounts-v1a.html: See the fix →

2 Card links one size too large on pages

Card masters use `btn-sm` for their in-card link (30 uses). Only 1 page link is small, so card instances show the default size.

Fix: Decide: keep small in cards (re-sync the instances) or make default the card size (update the 21 card masters).

3 Colour classes on a button that already has its colour

`btn-text` is brand blue by itself. 6 master uses and 16 page uses add `ink-white` or `ink-accent`. On dark grounds `ink-white` is needed; on light grounds `ink-accent` repeats the default.

Fix: Keep `ink-white` on dark grounds only; drop `ink-accent` where the ground is light.

cib-home-final.html (10) · equities-v2.html (1) · fixed-income-v2.html (1) · fx-v2.html (1) · initiatives-and-partners.html (1) · money-markets-v2.html (1) · rates-v2.html (1)

4 "See all" and "View all" for the same action

23 links say "See all", 3 say "View all", 0 say "Browse all" (Fact Grid master: "View all transactions").

Fix: Standardise on "See all ...".

Events: View all events · Fact Grid · Deals: View all transactions · Section Header: View all solutions

5 Links that go nowhere

5 text buttons on pages still point to `#`.

Fix: Point each at a real page or remove it.

`events-library.html: Read success story →` `insights-research.html: See all articles` `insights-research.html: See all events` `media-library.html: Read more →` `payment-tracker-v1a.html: See what you get →`

6 Text buttons without the arrow in masters

Every text button on the live pages has an arrow (typed or `is-arrow`). In the masters, 8 uses have none: the small Steps links, the Buttons master's download and plain examples, and Big Statement (typed arrow).

Fix: Add `is-arrow` to the Steps links so they match their page instances; keep the download style as is.

`Big Statement: See what's possible →` `Buttons: Read the report` `Buttons: Annual report (PDF)` `Cards: Steps · Carousel: Discover` `Cards: Steps · Carousel: Discover` `Cards: Steps · Scroll: Discover` `Cards: Steps · Scroll: Discover` `Cards: Steps · Grid: Discover`

Not a problem: Cards List uses icon-only text buttons (`btn-icon`) marked `aria-hidden`, because the whole card is the link. Screen readers read the card, not the arrow.
